**MATH AND STATISTICS SEMINAR**  
**Presented by: Christopher Leonardi**

---

Let's welcome Chris! 🎉

Join us for a talk by one of our newest faculty members on.....

**Title: Quantum Information Processing, with applications to Cryptanalysis**

**Friday, February 6<sup>th</sup> 3:30pm**  
**HSH 206**

About Chris...

Chris received his PhD from the University of Waterloo, where my primary research area was elliptic curves and their isogenies, in particular, how they apply to post-quantum cryptography. Additionally, I have spent many years on research and development teams in the cryptographic industry.

*Snacks & drinks provided — because math runs on snacks.* 😊
